Everyone has their own reason for choosing a MAGLITE® flashlight. Maybe your dad kept one in the truck, or you know someone who carried one on the force. It could be that you're looking for the latest LED technology, or you want Built-In-America dependability.

Whatever reason you have for choosing MAGLITE®, you'll be glad you did.

A U.S.A. manufacturer since 1979, Mag Instrument makes flashlights that are carried by thousands of law enforcement officers, emergency responders, military service members and ordinary people around the world. Every one of them has their own MagStory, and a few of them have even shared them.

Now, it's time to write yours. Let's get started by finding the perfect member of the MAGLITE® family to fit your needs

| - Incandescent series | Based on AAA / AA batteries |

ANSI/NEMA FL 1-2009

The Flashlight Basic Performance Standard – the “FL1 Standard” for short. The FL1 Standard defines four categories of flashlight performance, prescribes test equipment and procedures, and prescribes a set of logos for use in reporting the numbers on product packaging and elsewhere. The categories are as follows

Peak Beam Intensity :

Light intensity in candela (cd) at the brightest part of the beam. A lux reading in the brightest portion of the beam is taken at some distance (2m, 10m, or 30m) with the light on its brightest mode and tightest focus at some time between 30 and 120 seconds of turning the light on.

Beam Distance :

The distance in meters at which the flashlight produces a light intensity of 0.25 lux (equal to a full moon).

Impact Resistance:

Height, in meters, from which the light (including batteries) can be dropped onto concrete without cracking or breaking and still function.

Runtime:

The amount of continuous runtime (in minutes) until the light output drops to 10% of its original value (measured 30 seconds after turning the light on).

Light Output:

Total lumens of output, measured in an integrating sphere after the light has been on for 30-120 seconds.

Water Resistance:

There are three possible ratings:

IPX4 "Water resistant" Light can be splashed with water from all directions without water getting inside.

IPX7 "Water proof" The light can be submerged in 1 meter of water for 30 minutes. Water can leak into the light, but not into areas with electronics or batteries.

IPX8 "Submersible" The light can be submerged for 4 hours to some depth greater than 1 meter.

Solitaire Led

Art 11832 Maglite Solitaire Led – Black - Blisterpack

Art 11833 Maglite Solitaire Led – Black - Giftbox

"A Keychain-Size Flashlight with
Big-Light Power"

That describes our all-new
MAG-LITE® SOLITAIRE® LED Flashlight. It features the classic look of
our original Solitaire® flashlight introduced in 1988. And it works in the
same simple way – just twist the head to turn on, turn off and focus
spot to flood.

But thanks to a new, state-of-the-art LED light engine, you get
something you just wouldn't expect to see coming out of a flashlight
so small: A blast of power that can light up an object at the far end
of the parking lot

Specifications:

Length: 81 mm

Barrel Diameter: 12.70 mm

Head Diameter: 12.70 mm

Weight with batteries: 24 g

Batteries Required: 1 x AAA size alkaline (included)

Super Mini Led (Micromag Led)

Art 11720 Maglite Super Mini Led – Black - Blisterpack

Art 11834 Maglite Super Mini Led – Black - Giftbox

"Small, Simple, But Scorchingly bright"

Introducing the all-new MINI MAGLITE® AAA LED Flashlight.

The heir to the original Mini Maglite® 2AAA flashlight launched 25 years ago,
this newest member of the family features the same classic look and size and
the same simple operation – just twist the head to turn it on, turn it off and
focus the beam.

But thanks to a latest-generation LED light engine, it produces a beam whose
intensity is nothing short of amazing – from a pocket-clippable flashlight that's
not much bigger than a penlight.

Specifications:

Length: 127 mm

Barrel Diameter: 12.70

Head Diameter: 19 mm

Weight with batteries: 49.04 g

Batteries Required: 2x AAA size alkaline (included)

Minimag Pro Led

Art 11689 Maglite Minimag Pro Led – Black - Blisterpack

The iconic look of our original Mini Maglite® 2AA flashlight, introduced more than a quarter-century ago, is still seen in this newest member of the family. So is that same classic simplicity of function. But there's one big difference: A state of the art LED light engine for unprecedented performance.

- CLASSIC SIMPLICITY – Twist the head to turn on, turn off, and focus.
- MODERN POWER – Next-generation LED for a whole new level of brightness.

Specifications:

Length: 167.8 mm

Barrel Diameter: 18 mm

Head Diameter: 25.4 mm

Weight with batteries: 117.75 g

POWERED BY 2x "CR123" BATTERIES

3 Functions through Quick Click

- Momentary
- Full
- Power-Power Save

In developing the MAG-TAC® LED flashlight, we aimed to produce an advanced lighting tool that, in appearance, build quality and performance, would rival tactical flashlights costing several times more. The result is the first Mag® flashlight to use extreme-performance lithium CR123 batteries – a rugged, fast-handling, "fist-grabbable" flashlight that achieves truly stunning performance for its size. Thanks to a tailcap switch, it turns on and off without changing the beam's focal setting.

Designed with extensive input from police tactical users and yet suitable also for civilian use, this plain-bezel version of the MAG-TAC® LED flashlight comes with a detachable pocket clip and features three modes: Two power levels (Full Power for extreme brightness and Power Save for prolonged battery life) plus a Momentary mode (in which the light stays on only while the switch button is being pressed) – all selectable through Mag Instrument's tailcap-switch-activated "Quick-Click™" mode selector.

Specifications:

Length	: 131.95 mm
Barrel Diameter	: 26.67 mm
Head Diameter	: 26.67 mm
Weight with batteries	: 136 g
Batteries Required	: 2x CR123 batteries (included)

Maglite Mag-Tac Led Rechargeable

Art 11678 Maglite Mag Tac Rechargeable Led – Black Tactical switch – Plain Bezel

An advanced lighting tool powered by a high capacity Lithium Iron Phosphate (LiFePO4) rechargeable battery engineered for long service life with a 2.5 hr. charge time. Along with superior build quality and performance, this plain-bezel version of the MAG-TAC LED rechargeable flashlight comes with a detachable pocket clip and a USB powered mountable charging base. The charging base can be powered by the included 12V adapter or 220V converter, or by any other charging source that complies with the USB 2.0 Standard. Also, 4 Functions selectable through Mag Instrument's tailcap-switch-activated "Quick-Click" mode selector. Momentary, Full Power - 533 Lumens @ 2h 30min. runtime, Power Save - 112 Lumens @ 4 hr. runtime, & Strobe

Output	533+ lumens high upto 178 mtrs - Dimmable

Magcharger Led Rechargeable

Art. 11640 Maglite Magcharger Led – Box

Maglite lineup has 680 lumens of output and an intense 43,667 candela spot beam. The MagCharger LED uses a D-sized NiMH battery pack and is a full-size flashlight with 4.5 hours of regulated runtime on high and 16 hours on low. Five modes, including full power, power save, strobe, SOS, and momentary are organized into user-programmable function sets.

Key Specifications

Output	: 680 lumens high, 170 lumens low
Intensity	: 43,667 candela
Runtime	: 4h 30min high, 16h low
Battery	: NiMH Rechargeable Battery Pack
Length	: 12.6"
Diameter	: 2.3" bezel, 1.5" body
Weight with Batteries	: 28 oz.

Modes

Five modes, which are arranged into four function sets, are available to choose from.

Full Power	: Maximum output (100%).
Power Save	: Reduced output (25%).
Strobe	: The 12Hz strobe feature is designed for disorienting
SOS	: three short, three long and three short flashes.
Momentary	: If momentary is enabled, the light turns off when the switch is released, and it must be pressed twice in quick succession to activate constant-on.
For all modes except for momentary, a single click will turn the light off.	

Intelligent Energy Source Management

Continuously monitors the balance between high brightness and efficient power usage.

Balanced Optics

Advancing an engineering concept the ML100tm flashlight introduces a:

- Newly designed reflector
- Premium quality Led Module
- High output intensity for any chosen power setting

Powerful projecting LED beam

- Beam focuses with a twist of the head

Extended Battery Life

- The new multi-function electronic switch offers more options and versatility allowing prolonged battery life.

Included in the box are: Maglite MagCharger LED, NiMH rechargeable battery, charging cradle, AC adapter (100-240V), DC car adapter, and user manual.
